Technical Information Sheet

Part No. 0-442-15

High intensity Red LED warning light with chrome bezel. Dual voltage 4 LED unit with 19 programmable flash sequences, can be synchronized with other units, two bolt fixing. CE and ECE approved.

Additional information

Red wire +ve supply
 Black wire -ve ground
 White wire alternating flash
 Yellow wire synchronization and flash pattern

Momentarily connecting the yellow wire to red changes the flash pattern, sequencing it through the 19 patterns, connecting it 3 times in quick succession resets the flash pattern to default (sequencing). Connecting the yellow wires together synchronizes the lights provided they have been set to the same flash pattern. Connecting one white wire to red will alternate the flash pattern of a pair of lights.
