KEY BENEFITS:

DURITE SMART CAMERA SOLUTION FOR WEBFLEET

With Durite Smart Cameras you can now **record, track, manage & live stream** straight from the Webfleet platform.

DURITE KITS:

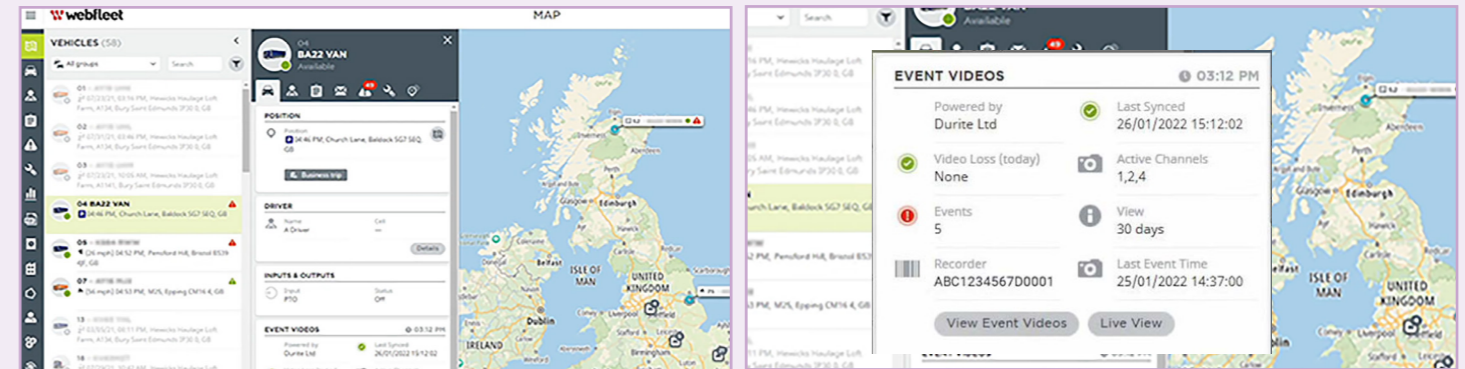

0-876-41 | RECORD EVIDENCE

- ✓ Record & view live crystal clear images with our 1080p Full HD forward facing camera and 720p HD side & rear cameras
- ✓ Vibration resistant & compact design of the DVR enables 360° mounting anywhere in the cab

0-774-26 | RECORD & COMPLY

- ✓ Help your drivers manoeuvre more safely, protect your assets and capture crystal clear evidence
- ✓ High definition for both day & night vision
- ✓ Comply with FORS, CLOCS, & DVS

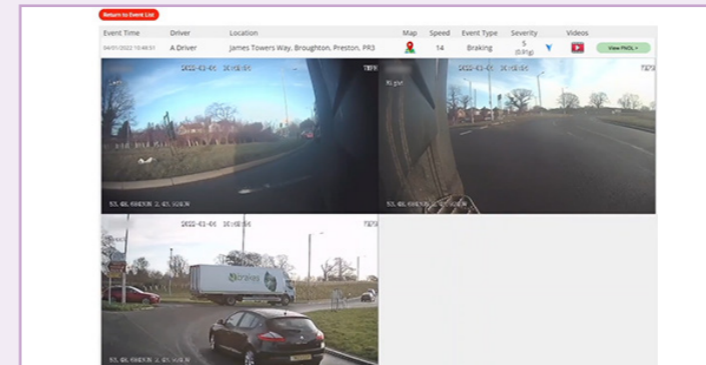

Access videos directly from the Webfleet portal

- The Durite Smart Camera Solution is now fully integrated with Webfleet, you can easily access all your fleet videos without leaving the telematics platform

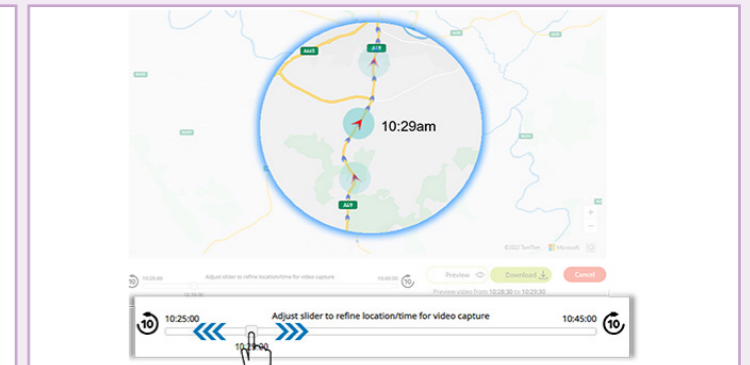

View camera status & incident alerts on the event videos panel

- Get instant alert updates if an event is triggered, or if there is video loss and view live status of the cameras

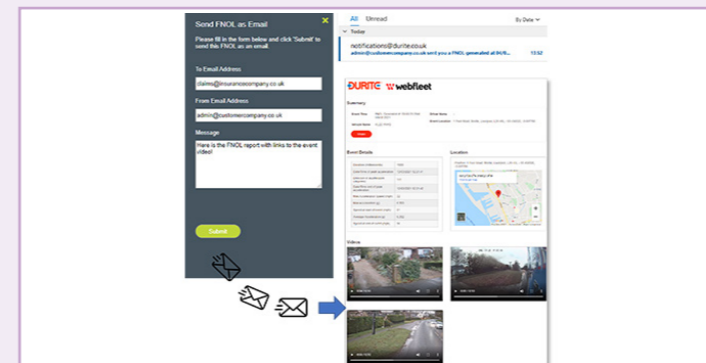

Incident videos are automatically saved to the cloud

- The system uses AI to detect possible incidents and automatically retrieves the video from the vehicles mobile DVR using Webfleet's telematics data. The footage is then automatically uploaded to one of the most secure cloud services 'Microsoft Azure'

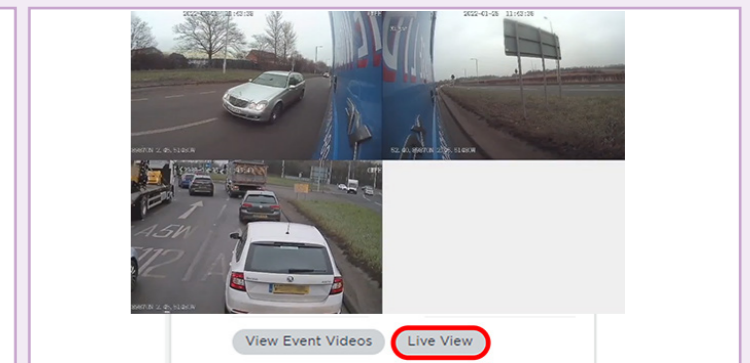

Retrieve video evidence by time, vehicle & location

- Retrieving incident videos couldn't be simpler. You can either use the vehicles registration, the event location and time on map view to pinpoint the exact moment of where and when the event was triggered

Email FNOL (First Notification Of Loss) reports with video links

- Easily generate a FNOL report with the video evidence which can be shared with your insurance service provider via email

Access 'Live View' of vehicle directly from Webfleet Telematics Portal

- Live video can be streamed from each vehicle and viewed without leaving the platform
